## SEASON LUMBER WITH HIGH-FREQUENCY CURRENT

NEW PROCESS DEVELOPED -- Kommunist, No 202, 27 Aug 49

In October, the Yerevan Factory of School Appliances will begin seasoning lumber by means of high-frequency current. A special high-frequency generator will be installed for this purpose. This innovation will considerably improve the quality of lumber for making furniture and other products, and will greatly speed up the lumber seasoning process and decrease its cost.

**LAMP-TYPE GENERATOR TO CUT SEASONING TIME --** Leningradskaya Pravda, No 205, 31 Aug 49

The assembling of a lamp-type generator for seasoning lumber is being completed at the Plant imeni Kalinin. Now, lumber before being used for manufacturing is seasoned not less than 23-24 days. After the new generator is put into operation, the entire seasoning process will take not over 14-16 hours.
